RYAN PAUL R. PALOMO

Full Stack Developer

Philippines | +63 956 409 3738 | palomoryan23@gmail.com | Portfolio: ryanpalomo.vercel.app

SUMMARY

Full Stack Developer with production experience building client-facing web applications end-to-end — front-end through database — using JavaScript, React, and Node.js/Express on PostgreSQL, plus PHP/MySQL. Additional hands-on experience with WordPress development/administration and Shopify/Liquid customization for enterprise and consumer-facing clients. Comfortable working cross-functionally with designers, business stakeholders, and senior developers to ship and troubleshoot production features.

WORK EXPERIENCE

NEXERA SOLUTIONS Nov 2025 – Present

Full Stack Developer (Part-Time)

- Co-founded Zupport, a SaaS customer-support and ticketing platform; built 10–15 REST API endpoints on Node.js/Express and partially designed the PostgreSQL schema and authentication, connecting front end to API to database under senior guidance.
- Built 8+ major features — authentication, role-based access, ticket management, live conversations, analytics dashboards, and tenant/user management — deployed on Vercel and in active use by a paying client company; debugged and resolved production issues to keep the platform stable.

GOCOMMERCE Aug 2025 – Present

Jr. Web Developer

- Translated Figma designs into 15–20 responsive landing pages and 20–25 custom front-end components (Liquid, HTML, CSS, JavaScript) across 5 client storefronts, collaborating with designers and stakeholders to ship production-ready features.
- Diagnosed and resolved recurring front-end and third-party integration issues, improving site reliability and contributing to sales growth of up to 103% year-over-year across client stores.

FREELANCE Mar 2025 – Nov 2025

Web Developer (Part-Time)

- Built, deployed, and administered a WordPress website for a client, including theme customization, plugin configuration, and content and UI management.

GOCOMMERCE Feb 2025 – May 2025

Full Stack Web Developer Intern

- Built and enhanced Shopify features using Liquid and JavaScript under senior developer guidance; implemented UI fixes and optimizations across multiple client projects.

PROJECTS

ECOMEND (Capstone — Full-Stack + Machine Learning)

- Built a full-stack web app (PHP, MySQL, HTML, CSS, JavaScript, Bootstrap) integrating a Python CNN image-classification model (78–80% accuracy) with the Gemini API to recommend sustainable reuse ideas — connecting a JS/PHP web app to a separate Python ML service.

PULSE PREORDER (Shopify Embedded App)

- Building an embedded app (Remix, TypeScript, Prisma, PostgreSQL) integrating Shopify's GraphQL Admin API; diagnosed and fixed a production database connectivity issue caused by an IPv4/IPv6 mismatch in the connection-pooling configuration.

EDUCATION

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES 2021 – 2025

Bachelor of Science in Information Technology

Magna Cum Laude; Academic Achiever (Overall Top 10), 2025
